Guidelines for the implementation of Indigenous Languages and Cultures Programs in schools

Keeping Indigenous Languages and Cultures Strong — A Plan for Teaching and Learning of Indigenous Languages and Cultures in the Northern Territory
These guidelines are designed to assist Northern Territory (NT) government schools to deliver Indigenous Languages and Cultures (ILC) programs in line with the Northern Territory Board of Studies *Keeping Indigenous Languages and Cultures Strong – A Plan for Teaching and Learning of Indigenous Languages and Cultures in the Northern Territory* (hereafter referred to as the Plan).

In line with national standards, the Plan establishes a framework for ILC programs to be delivered as an Australian Curriculum Languages learning area.

While all students in the NT should have access to learning a language, the decision to teach an Aboriginal language is made by the school and the school community.

There are currently at least 50 schools across the NT delivering ILC programs in 27 different languages.\(^2\)

The form in which these programs exist include systematically delivered programs taught throughout the school year, intensive programs taught over a few weeks each year and programs that have a culture-only focus. The NT Department of Education (the department) acknowledges the value of all ILC programs as well as the challenges faced by schools in delivering them within the context and resource availability of each school.

---

1. *Keeping Indigenous Languages and Cultures Strong – A Plan for Teaching and Learning of Indigenous Languages and Cultures in the Northern Territory* 2017 p.4

2. *Keeping Indigenous Languages and Cultures Strong: A basis policy for the teaching of Indigenous Languages and Cultures in schools in the NT. (Discussion Paper)* 2016 p.11
These guidelines provide an implementation process and advice to assist schools to work towards the goals of the Plan and for the school, school community and Aboriginal language and culture custodians to:

• build the capacity of an existing ILC program
• re-establish an ILC program that previously existed
• establish an ILC program for the first time.

These guidelines are supported by various appendices, attachments and templates. These can be found at [www.education.nt.gov.au/education/policies](http://www.education.nt.gov.au/education/policies)

What is an Indigenous Languages and Cultures program?

An Indigenous Languages and Cultures program is a program offered by the school in an Australian Aboriginal language. At the heart of teaching and learning Indigenous languages and cultures is cultural knowledge. An ILC program allows students to engage with cultural knowledge and content within the conceptual framework of a specific language and community.3

Ownership of each Aboriginal language belongs to the group of people who are its custodians. Languages can be taught in schools with the consent and agreement of their custodians and the commitment of local staff and the community to share and teach their language and cultural knowledge.

Benefits to student learning

An ILC program provides opportunities for all students in the NT to:

• learn and engage with and through an Aboriginal language and culture as a basis for participation in the social and economic life of the NT
• acknowledge and respect the histories, values, languages and cultures of Aboriginal Territorians
• develop meaningful relationships with Aboriginal people that value community knowledge, wisdom and experience and demonstrate trust and respect.

Additionally, in the NT, Aboriginal languages are still the primary medium of communication in many locations, and significant numbers of students speak an Aboriginal language as their first language. An ILC program provides the opportunity for these students to:

• extend their communication and literacy abilities
• strengthen their understanding of the nature of language and culture and the processes of communication
• strengthen their intellectual, analytical and reflective capabilities and enhance creative and critical thinking
• explore and engage with local cultural knowledge as a foundation not only for learning language but for studies in Humanities and Social Sciences and Science.

It is also important to acknowledge the many students, particularly within the urban schooling context, who identify with an Aboriginal language and cultural group while no longer speaking the language. For this group of students, an ILC program provides opportunities for recognising, valuing and strengthening cultural identity and sense of self.

3. Adapted from Keeping Indigenous Languages and Cultures Strong - A Plan for Teaching and Learning of Indigenous Languages and Cultures in the Northern Territory 2017 p.28
Curriculum and program pathways

The Northern Territory Board of Studies (NTBOS) has approved the Northern Territory Indigenous Languages and Cultures Curriculum as the curriculum for teaching ILC programs in NT schools.

The curriculum provides a guide for the school and school community to negotiate what language and culture will be taught and how it will be taught.

The curriculum has been developed to accommodate a variety of language learning pathways to meet the needs of individual schools and student cohorts, namely:

- First Language Pathway (L1)
- Second Language Learner Pathway (L2)
- Language Revival Pathways (LR)
- Language and Cultural Awareness Pathway (LCA).

Figure 1 outlines the model for the NT ILC Curriculum and language learner pathways.

Selection of a language learning pathway is also negotiated with the school community and based on the student and community language profile and the situation of the language(s) (i.e. how active the language is).

Appendix 1 Program pathway characteristic summary outlines the characteristics of each program pathway to assist schools in comparing their student and community language profiles against the pathway options.
Figure 1 A model for the NT ILC Curriculum
A successful ILC program will be achieved through balancing the school’s and community’s priorities and ways of working.

Figure 2. Utulu kutju Nintiringanyi (UKN) is a model for the school and community to work together to support children’s learning from Areyonga (Utju) School. This model identifies the different perspectives and requirements the school and community need to negotiate. This will be achieved by the community and school coming together to talk and learn about each of the perspectives as a basis for deciding on:

- common goals
- ways community and school will work together
- the responsibilities of the school and those of the community for achieving these goals.

UKN represents the non-Aboriginal person coming to the hearth and sitting down to talk, learn and work together with local Aboriginal people.
Guidelines for the implementation of Indigenous Languages and Cultures Programs in schools

SHARED RESPONSIBILITY

What do we want to happen?
What is school responsible for?
What is community responsible for?
How will we decide if the program is working?

SCHOOL AND COMMUNITY

Talking, working and learning together to make a strong language and culture program

How to work the right way with language and culture.
What can we teach at school?
Why do we want to teach it at school?
Who can teach it?
How do we know the kids are learning what we want them to learn?

NTBOS policy and guidelines
NT ILC Curriculum, assessment and reporting requirements
NT DoE requirements for teachers

Figure 2 UKN – A model for working together. Reproduced and adapted with permission of Tarna Andrews (B.Ed), Areyonga School, 2016.
The implementation of ILC programs involves leadership and support at the system, school and community levels.

**System level**

**School Support Services** is responsible for:
- developing support materials for schools to assist with the teaching, learning, assessing and reporting against the NT Indigenous Languages and Cultures Curriculum
- evaluating the implementation and outcomes of ILC programs in the NT.

**Human Resources** is responsible for:
- assisting and supporting the employment and professional development of Aboriginal people in schools
- managing and providing training in the use of a professional learning system that enables schools and regions to record and report on workforce development.

**Performance and Data Management** is responsible for:
- assisting regions and schools to collate and analyse data that enables the review of ILC programs against performance measures.

**School Operations North and South** are responsible for:
- providing advice and guidance to schools undertaking community consultation and engagement to establish an ILC program agreement
- monitoring and reviewing the implementation of ILC programs within their regions through the School Review process.

**Regional offices** are responsible for:
- establishing regional networks and facilitating workshops for teachers and teaching teams to clarify, confirm and review assessment tasks and student work
- providing professional development opportunities for Aboriginal language speakers/teachers to support ILC workforce development
- promoting team teaching practice in schools
- identifying and addressing barriers to ILC program delivery in the region.
School level

**School principals** are responsible for:

- acknowledging that an ILC program can only be implemented through meaningful partnerships with community members
- initiating and maintaining consultation and engagement with the community and its leaders about an ILC program
- establishing a sustainable ILC program agreement with community language representatives
- ensuring adequate funding and time is allocated to the program development and delivery
- ensuring program coordination and administration tasks are managed by themselves or a nominated person
- establishing and supporting performance and development plans for all staff
- establishing partnerships to support the development and delivery of the ILC program
- establishing performance measures and data collection processes within the school to measure program performance and facilitate program reviews and an improvement agenda.

**School Council** is responsible for:

- providing strong direction and vision for the ILC program
- sharing information with the community about ILC and encouraging strong partnerships between the school community and the school
- appointing an ILC advisory group/committee (where appropriate) to assist with community consultation and provide ILC program advice to the school council
- supporting the allocation of resources in the school’s global budget, including the commitment to employ language teaching staff.

*Where a school has a Joint School Representative Body or a Parent Consultative Group, these groups will provide the principal with advice on the ILC program and may assist with community consultation; however, they do not have the authority to appoint an advisory committee or provide budget advice.*
ILC program coordinators (where capacity exists to appoint one) are responsible for:

- coordinating and supporting program development, planning and resource management
- undertaking administrative tasks to support staff and Aboriginal language speakers/teachers to deliver the program, such as;
  - organising Ochre Cards
  - finding alternative Aboriginal language speakers/teachers if someone is sick or occupied with other business
  - organising transport for the Aboriginal language speakers/teachers as required
  - keeping timesheets and passing them on for payment
- looking after resources and documentation relevant to the program.

Assistant Teachers are responsible for:

- advising on cultural protocols for engaging with Elders and Traditional Owners and in teaching language and culture
- participating in ‘planning together’ sessions to assist with developing the ILC program scope and sequence, units of work and lesson plans
- assisting with or (where appropriate) delivering ILC lessons
- working in a teaching team to assess and maintain records of student progress and achievement
- engaging in professional learning in accordance with their performance and development plan.

Aboriginal language speakers/teachers are responsible for:

- teaching the children to understand and use the language and culture of the program
- participating in planning time and working in teaching teams to inform the development of the ILC program scope and sequence, units of work and lesson plans
- participating in ‘learning together’ sessions to assist teachers in understanding cultural protocols and the language and culture being taught
- assisting with the selection and development of ILC program resources
- engaging in professional learning in accordance with their performance and development plan.

Classroom teachers are responsible for:

- developing their cultural and language awareness
- working in a teaching team and providing full support to Assistant Teachers and Aboriginal language speakers/teachers in ILC program development and delivery.
Community level

Community leaders/Traditional Owners/Elders are responsible for:

- providing permission for the school to use the knowledge and language of which they are the custodian and engage with the school to establish an ILC program agreement
- working with the school and community to decide what language(s) will be taught and which ILC program pathway will be used
- providing the relevant language speakers with permission to teach the language and culture
- working with the school to decide what can be taught and how, when and where it can be taught
- teaching where they feel comfortable to do so and with the support of others.
4. GUIDELINES

There are three key phases to the implementation of an ILC program within a school: initiating, embedding and reviewing.

The initiating, embedding and reviewing phases are interdependent, and a program’s success and sustainability depends on all being carried out effectively.

This will not always be a linear process, and schools may have to revisit and amend certain elements of the program’s development to ensure they all align with the program’s goals.

The timeline for working through each phase will vary for individual schools and depend on whether the school is establishing a program for the first time, re-establishing a program that previously existed or aligning an existing program within the Plan and the Northern Territory Indigenous Languages and Cultures Curriculum.

Additionally, each ILC program is unique based on the languages and cultures being taught, the program learner pathway being delivered, the resources available and the context of the school. However, as outlined in Section 5. Case Studies, ILC programs do have common factors, which are the focuses of these guidelines.

Each ILC program is unique based on the languages and cultures being taught and the program learner pathway being delivered.

Appendix 3 Case studies provides five short case studies that give a snapshot of the teaching and learning of ILC in the NT across different schools and learner pathways.
Figure 3 Implementation framework for a quality Indigenous Languages and Cultures program
4.1 INITIATING PHASE

Strong ownership

Consultation and engagement

Strong ownership and decision making by Aboriginal leaders who are the owners and custodians of the languages and cultures is a key principle of an ILC program. Additionally, there are a variety of stakeholders within the school and school community who also need to commit to and own a school ILC program. Table 1 on the following page outlines stakeholder groups to be consulted and the key issues to be addressed.

The consultation and engagement process will establish the foundation of an ILC program and, therefore, must be well planned and coordinated. Protocols must be adhered to when speaking with Aboriginal leaders, Elders and Traditional Owners to ensure respectful relationships are built.

A Stakeholder engagement plan will assist with this process and ensure all key program issues are discussed with all relevant stakeholders. A consultation timeline will assist with maintaining momentum and ensuring people remain engaged, although timelines may need to be flexible to allow stakeholders sufficient time to consider the program and their individual roles.

A Feedback register should also be established to record the opinions, concerns and general feedback of stakeholders.

The consultation and engagement process will establish the foundation of an ILC program and therefore must be well planned and coordinated.

Template 1 Stakeholder engagement plan provides an example of how schools can plan their consultation.

Template 2 Feedback register provides an example of how schools can record feedback, concerns and issues that stakeholders express.

Useful resource

The Northern Territory Government has also published some useful resources to guide the community engagement process http://www.bushready.nt.gov.au/good-engagement.
A School Council may decide to appoint an ILC advisory group to provide advice regarding the implementation of an ILC program.

The ILC advisory group could:

- assist with the consultation process and gathering information and data about the school and school community language profiles
- report to the School Council on the school community’s feedback about the idea of an ILC program
- explore and identify possible ILC program partners
- advise on the viability and sustainability of ILC program pathway options
- provide feedback on the performance of the program.

Where a school has a Joint School Representative Body or a Parent Consultative Group, these groups will provide the principal with advice on the ILC program and may assist with community consultation; however, they do not have the authority to appoint an advisory group or provide budget advice.

Table 1 Consultation and engagement

<table>
<thead>
<tr>
<th>STAKEHOLDERS</th>
<th>KEY ISSUES</th>
</tr>
</thead>
</table>
| School Council/Parent Consultative Group | • endorsement of ILC program implementation and resourcing in school  
• where a school has a Joint School Representative Body or Parent Consultative Group, they should be consulted; however, they do not have the authority to provide budget-related advice |
| All school staff | • support and feedback on program pathway options, professional development needs and resourcing requirements |
| Aboriginal school staff/Assistant Teachers | • support and understanding of responsibilities that will be placed upon themselves and other language speakers/teachers  
• gaining feedback on program pathway options, professional development needs and resourcing requirements  
• identifying key Aboriginal Elders/Traditional Owners that must be consulted and the languages they speak |
| Aboriginal leaders/Elders/Traditional Owners | • granting permission for the school to teach Aboriginal knowledge and language(s)  
• identifying who can teach the language(s) and culture  
• negotiating and establishing an ILC program agreement between language custodians and the school |
| Parents | • informing parents about what an ILC program is and seeking feedback on what language(s) and culture should be taught |
| Potential program partners | • identifying potential program partners—such as language centres, neighbouring schools, community and government organisations, universities and training organisations—and what support they can provide |

Template 3 School ILC advisory group/committee terms of reference is a template that the School Council may wish to use or adapt to govern the appointment and functions of an ILC advisory group.
Choosing the language and program pathway

Prior to making any decisions on an ILC program pathway, the school should gather the following language profile data:

- the language groups in the school community
- the language group/s of landowners
- the number of people in the school community who speak each language
- the number of students who speak each language
- the number of staff who speak each language
- the languages that can be taught orally and in reading and writing
- the resources that are available for each language (people and materials).

This data could come from:

- consultation with the school community
- linguistic surveys
- student data.

Using language profile data, the school must consider the program pathway options that are available to them and which program pathway option/s best suits their students, schooling context and resource availability.

Appendix 1  Program pathway characteristic summary outlines the characteristic of each program pathway to assist schools in comparing their student and language data against the pathway options. Schools should also refer to the Plan for further information on program pathways (pp. 31–41).

Program size and structure

The size and structure of each school’s ILC program will differ and be based on a variety of factors, including the school and school community language profile, the size of the school, and the available resources and language speakers.

Table 2 provides examples of different ILC program sizes and structures that schools may adopt.
### Table 2 Program size and structure examples

| **Starting small** | Where there are limited speakers and resources available, the school and community are best to start small. This may involve:  
- running lessons for one class only (e.g. Year 1 or Year 8)  
- planning a short program for one term  
- offering the program as an elective for interested students.  
The school and community can then build on the program capacity as resources, capability and structures are put in place to support this. |
| **Teaching more than one language** | More than one language can be taught at the same time where the language profile data and resource availability support such a decision. This would occur:  
- where there are students from more than one language group living in the community, such as in Maningrida, Ti Tree and Ngukurr  
- where students are speaking one language as their first language but identify with another language, such as in Galiwin’ku, where the students speak Djambarrpuynngu but also identify with a clan language. |
| **Adopting more than one pathway** | Where more than one language is being taught, the school may choose a different program pathway for each language. The student profiles and language situations will highlight cases where this could occur. For example:  
- at Galiwin’ku, where students speak Djambarrpuynngu as their first language and may have to learn their clan language through a language revival pathway  
- in the Katherine region, where students speak Kriol as their first language, and communities may wish the students to learn their heritage languages through a language revival pathway. |
Co-ordinated partnerships

ILC program agreement

Once the school, school community, and language owners and custodians have reached a consensus through the consultation and research process, the outcomes should be represented through some form of ILC program agreement. This may be in the form of a written agreement, a piece of artwork, a special ceremony or meeting or combination of these forms.

Regardless of how the ILC program agreement is established, there should be a clear understanding of the elements by all parties outlined in Table 3.

If a written agreement is formed, it is recommended that it be translated into the language(s) to be taught and displayed within the school.

The establishment of the ILC program agreement should be celebrated by the school and school community.

The school and/or community should organise a special event to acknowledge the agreement and the establishment of a partnership and commitment to keeping the community’s languages and cultures strong.

Template 4 School ILC program agreement provides a template for a written ILC agreement that schools may wish to use or adapt to their own needs.

Data identification

Performance measures

The principal will need to develop a plan for the collection of data that will allow the school to measure the program’s performance.

Performance measures will be based on the ILC program goals. Performance measures will vary from school to school and will depend on factors such as the program pathway being delivered and whether the program is an existing or new program.

Once the measures have been established, the school will determine its data needs and how that data will be collected. Some data-collection practices will already exist for the school (for example, student achievement in the Student Achievement Information System (SAIS)); however, other measures may require the school to establish local data-collection methods and practices.

It is important that the school collects baseline data on the performance measures at the commencement of the program.

Examples of performance measures and data collection are provided in Table 4.
Table 4  Performance measures examples

</tbody>
</table>
4.2 EMBEDDING PHASE

Embedding an ILC program in the school involves the systematic planning and delivery of curriculum, allocation of resources and budget, and development of expert teaching teams.

Where a school’s capacity and resources permit, the establishment of an ILC program coordinator role would promote the development, delivery and capacity building of the program (refer to Roles and responsibilities section).

**Systematic curriculum delivery**

**School scope and sequence**

Classroom teachers and language speakers/teachers will work collaboratively to develop a scope and sequence aligned with the Northern Territory Indigenous Languages and Cultures Curriculum.

Additionally, the Northern Territory Indigenous Languages and Cultures Curriculum cuts across the subject matter and concepts of other Australian Curriculum learning areas; in particular; Humanities and Social Sciences, Science, Arts and Health and Physical Education. Schools are encouraged to integrate curriculum learning areas to provide a learning experience that is relevant to the students’ needs.

The scope and sequence should cover all year and age levels that were agreed upon in the ILC program agreement. It will also inform the school of how students will need to be grouped for certain lessons depending on the cultural knowledge being taught; for example, language/clan/skin groups, boys and girls or age groups.

**ILC Curriculum resources are available on Learning Links.**
Timetabling

Flexibility is a feature of successful ILC programs. The timetable should:

- reflect when lessons can happen
- be adjusted when necessary to allow for staff availability, community events and On Country lessons
- provide time for teaching teams to plan together.

The NTBOS Curriculum, Pedagogy, Assessment and Reporting Framework for Quality Education in Northern Territory Schools 2018-2020 provides recommended time allocations for the teaching of languages. The school and community should use this as a guide to determine their ILC program teaching time allocations.

Assessment

Assessment is to follow the department’s Quality Assurance Assessment Cycle which supports a shared understanding of curriculum levels and standards, and consistency of teacher judgement.

Teachers and teaching teams (where available) are to work together with colleagues to engage in school, regional and system level clarifying and confirming (moderation) each semester. For one-teacher schools, the process will begin at a regional level.

The Quality Assurance Assessment Cycle assists teachers and teaching teams to:

- plan using curriculum achievement standards
- plan using the Aboriginal languages required in the delivery of the ILC Curriculum
- clarify and confirm ILC achievement standards
- support consistency and integrity of teacher judgement
- review and improve assessment practices that contribute to improving student learning
- promote a collaborative professional learning community within the school and region.

Professional learning resources and Materials to support teachers to use the Quality Assurance Assessment Cycle process can be accessed from Learning Links.

Reporting student progress

ILC student achievements are reported to parents using A–E grades recorded in the Student Achievement Information System (SAIS). Teachers will use the Indigenous Languages and Cultures reporting area built into SAIS and ensure that the program pathway, language and a comment are included.

Where integrated curriculum units are delivered, it is expected that schools will report student outcomes against both curriculum learning areas.
**Planned use of resources**

**Language and culture teachers**

ILC program planning, teaching and assessing can only be achieved in collaboration with Aboriginal language speakers who have the relevant permissions to teach the language and culture.

If the relevant language teachers are not already working within the school, the school will need to employ the appropriate language speakers/teachers. A job description that outlines responsibilities will assist in setting out the expectations of language speakers/teachers employed to deliver the program.

All people who engage with students within the school must have a current Working with Children Clearance (Ochre Card) unless they fit the eligibility criteria for an exemption.

**Appendix 2** Working with Children Clearance Notices fact sheet provides advice to schools on clearance requirements and exemptions.

**Resource materials**

During planning time, teaching teams will identify what resources currently exist and what resources need to be developed for a unit of work. Schools should refer to Learning Links for information about where to source ILC resources.

Existing resource materials should be checked to ensure they are appropriate for use.

- All materials containing cultural knowledge should be approved by appropriate people for use with students of the intended age groups and genders.
- Videos, audio or photographs should be checked for images of deceased people and approval sought for their use.

Where new resources need to be developed to support the program, the school must provide the time, space and materials required for these to be produced.

Consideration should also be given to the safekeeping of resources, including:

- back-up and digitisation, which may include plans to lodge the resource with:
  - Living Archive of Aboriginal Languages (LAAL)
  - Australian Institute of Aboriginal and Torres Strait Islander Studies (AIATSIS)
  - Centre for Australian Languages and Linguistics (CALL)
- storage that protects the materials from physical deterioration
- storage that respects protocols around access and viewing.
Resources, copyright and moral rights

All resources developed by employees of the school or school council to support the program are owned by the school (NT Government) or the school council (i.e. the school/school council owns the copyright).

However, the school must acknowledge and attribute any resources containing language and cultural knowledge to the author of the materials. The school must not claim credit for the work or use or modify the work in any way that may cause offence to the author/creator. These are the moral rights of the author/creator of the resource.

It is important that schools respect and acknowledge that the stories and pictures being used to teach ILC programs belong to the language owners and their descendants.

Additional resources and partnerships

Partnerships with language centres, neighbouring schools, community and government organisations, universities and training organisations can support the implementation of an ILC program.

Examples of such partnerships include:

- regional and interschool networks and activities, such as moderation workshops for schools teaching the same language, ILC lesson planning workshops or establishing ‘sister school’ programs
- arrangements with Aboriginal ranger programs to assist with the teaching of language and culture, including the delivery of On Country lessons
- working with regional language centres to share and develop resources and language expertise where permission has been provided by the language custodians
- developing relationships with universities and linguists to improve the teaching and understanding of Aboriginal languages.
Expert teams

Teaching teams

All members of the teaching team will have key knowledge and skills to contribute to the development and delivery of the program.

Local language speakers/teachers hold and share knowledge of their language and culture. Some may also have many years’ experience in working within a team teaching situation and teaching Aboriginal languages and cultures.

Classroom teachers will bring and share knowledge of curriculum development, teaching, assessment and reporting and the system requirements for subject area teaching and learning.

In team teaching Aboriginal and non-Aboriginal team members, take turns as leaders and learners when working together to decide what and how to teach as well as who will teach. This approach builds strong team practices and develops individual knowledge and skills.

Some examples of professional learning and development that support ILC program delivery include:

- the ILC program coordinator being supported to develop knowledge of the language, formal qualifications in languages teaching, program management and coordination skills or leadership skills
- Assistant Teachers being supported to progress through the Assistant Teacher Professional Standard Levels and pathways for language teaching to continue on to qualify as a teacher or attend workshops and training opportunities
- language speakers/teachers being supported to progress through the Assistant Teacher Professional Standard Levels, work towards a teaching qualification or other accredited qualifications, or attend workshops and training opportunities in language work, linguistics or language teaching
- all staff are being supported to become effective team teachers through in-service ‘learning together’ sessions and, where relevant, becoming a qualified language teachers.

Team Teaching resources are available on Learning Links and provide schools with ‘learning together’ modules that will assist in building effective team teaching practices.

Workforce development

The sustainability of ILC programs relies on the capacity of the language teaching workforce. Understanding and meeting the professional development needs of language teaching staff is key to the success of the program.

It is the role of the principal to ensure that all teaching staff have a performance and development plan that identifies the individual’s professional development goals. The principal is also responsible for ensuring that employees are provided with the opportunities and support to realise these goals.

Registered Teacher Performance and Development resources and the online Teacher Performance Plan facility should be used for registered teachers.

The Assistant Teacher Performance and Development Plan template is recommended to be used for all Assistant Teachers and language speakers/teachers.
Recording and reporting on workforce development – Professional Learning System

The Professional Learning System enables the online recording of staff professional development and learning and should be used for all school staff, including language speakers/teachers. This requires all staff to have an NTSchools ePass account.

School-level professional learning reports are generated each term from the Professional Learning System. Principals can access the reports from myBiz and track them against performance and development plans.

Schools should ensure that any in-service training that aligns with the Australian Professional Standards for Teachers or the Assistant Teacher Professional Standards is entered into the Professional Learning System as a training event and all staff attendance recorded against it.

The Professional Learning System and associated resources will guide schools and staff through registering for learning events and registering their own learning events. Technical support and training is also available.
4.3 REVIEWING PHASE

Schools will review their ILC program in line with the ILC program agreement review date to inform the future direction of the program and establishment of a new agreement.

Data analysis

The principal will need to lead the program review through collating and analysing performance measurement data.

It is important that performance measurement data is presented and discussed with the school community. The stakeholder consultation and engagement process outlined in these guidelines should be applied for this process.

The objective is to use the data to determine what can be done to improve the performance in each area and/or what are the reasons for the program achieving well in certain areas and how can this be sustained.

Performance indicators

Schools may also choose to use performance indicators as part of their ILC program review process. Performance indicators are not used to measure program performance but when reviewed, may indicate that the program is influencing or affecting performance in certain areas.

Table 5 details some examples of performance indicators and data collection methods that a school may use in reviewing their ILC program.
Table 5 Performance indicator examples

Program milestones

Schools should remember to recognise the program milestones and achievements that are not necessarily linked to the program goals. These should be identified and celebrated openly, with recognition going to those who have contributed. Such milestones and achievements may include:

- the talking, learning and working together that has occurred between the school, the school community and language owners and custodians
- the growth of the program (for example, from years T–4 to T–6 or from an oral language program to including reading and writing)
- the development of lesson plans and resources to support teaching and learning
- the teaching and learning that has occurred On Country
- partnerships with language centres, regions, other schools or organisations
- how people feel when they are participating in the program and student achievements.
Appendix 3 consists of five short case studies that provide a snapshot of the teaching and learning of ILC programs in different schools across the NT. These case studies may assist schools in assessing how they may structure their own ILC program.

The case studies demonstrate the variety of learner pathways and programs currently being delivered. They also show that each program works differently and faces different challenges, depending on the school context and the resources available. However, the case studies also highlight that there are a number of factors that are common to each program, including:

- the involvement of Elders and community members in the programs
- cultural days and weeks, including visits to country as well as teaching and learning in the classroom
- visits to local organisations
- representation of the program within school leadership, including local Aboriginal teachers and community members as leaders
- ongoing allocation of resources, including the allocation of teachers, the employment of community teachers and leaders, and resource development
- structured developmental programs that can be handed onto new staff
- supportive teams of Aboriginal and non-Aboriginal colleagues engaged in curriculum planning, resource development and delivery
- a qualification and career pathway for younger teachers to learn through an apprenticeship or ‘on-the-job’ model
- partnership/relationships with other organisations, including community and regional language centres, universities and other education providers, and other schools in the region or sector
- ongoing professional learning and teacher training for speakers of the language.

Appendix 1. ILC program pathway characteristic summary

There are a number of factors that the school and school community must consider together when deciding on a program pathway. This includes the language profile data of the community and students, the school and community commitment and capacity to deliver the curriculum, and the community’s permission for the school to teach their languages and cultures as well as their agreement to support the program through the provision of language and culture teachers.

Characteristics of each pathway are summarised below. Full detail of each pathway is provided in the *Keeping Indigenous Languages and Cultures Strong – A Plan for Teaching and Learning of Indigenous Languages and Cultures in the Northern Territory* (p 31–41).

Appendix 2. Working with Children Clearance Notices

This information has been produced to assist schools with understanding and meeting their Working with Children Clearance responsibilities under the Care and Protection of Children Act. Refer to the Working with Children Clearance Notices (Ochre Card) policy and the Care and Protection of Children Act for further information.

Who needs an Ochre Card?

All people engaged in child-related work in the NT are required to have a Working with Children Clearance Notice (Ochre Card).

Pursuant to Section 185 of the Care and Protection of Children Act (the Act), a person is engaged in child-related work if they are working (paid or unpaid), volunteering or training within any school in the Northern Territory, including non-government schools and independent public schools, where the work may potentially involve contact with children.

Who is exempt from requiring an Ochre Card?

Section 186 of the Act provides the following three exemptions to the requirement to have an Ochre Card. The individual must meet all of the criteria for the exemption type they fall within.

<table>
<thead>
<tr>
<th>EXEMPTION TYPE</th>
<th>CRITERIA (note the person must meet all of the criteria under the exemption type)</th>
</tr>
</thead>
</table>
| Parent         | The individual:  
1. is engaged as a voluntary worker in a capacity other than for work requiring overnight stay; and  
2. is a parent of at least one of the children with whom they may have contact with at the school; and  
3. is working under the direct supervision of someone who holds a current clearance notice; and  
4. is not required by the principal of the school to hold a clearance notice. |
| Under 15       | The individual:  
1. is less than 15 years of age. |
| Interstate resident | The individual:  
1. is not a resident of the Territory; and  
2. is engaged as a voluntary worker to perform child-related work; and  
3. is so engaged for a total period that does not exceed the limit prescribed by regulation (14 days within a 12-month period). |
Accessing identification to apply for an Ochre Card

There are many types of identification that a person can use to support their application. Click here for a full list.

In cases where a potential employee does not currently have sufficient identification to support their application, the school should try to assist by connecting them to relevant agencies such as:

- **NTG Births, Deaths and Marriages**
- Centrelink
- Local Council office (some provide ID documents)
- the applicant’s banking institution.

What if the school needs the person’s services immediately?

The school principal may apply for a temporary exemption once an application has been submitted. A temporary exemption will allow the person to work in the school under the supervision of a person with a current Ochre Card while their application is being processed.

This form is found here: https://nt.gov.au/__data/assets/pdf_file/0019/237322/working-with-children-employer-temporary-exemption-form.pdf
Appendix 3. Case studies

School 1 First language (L1 maintenance)

The language
The language used is the language of everyday communication in this community (pop. 640) and in other smaller communities, and it is one of a number of languages spoken in a large regional centre nearby.

The children have typically learnt the language from their families as a first language and use it at home and at play. The students may have varying skills in other languages, including varieties of English, and are learning English at school.

Student participation and achievement

School enrolment: 130–145

Student achievement in ILC as reported to parents:

There is a curriculum outline that has been developed over more than 30 years of delivery and mapped to the ILC component of the NTCF.

Goals of the program have been articulated as:

- to learn to speak the language well
- knowing and understanding the important aspects of culture, such as family and land
- to develop literacy in the language to the same level as English, recognising language and the ability to translate as an important skills for jobs such as translating and interpreting, Centrelink, police, health and teaching
- to support learning through English.

An important element of the curriculum is On Country visits with Elders as the main teachers of the children.

The program is developed across each year level to Year 8 and then as a composite program for the senior years.

The teacher appears to have an understanding of what she expects from each year level, and she is particularly insistent that the students in the upper years understand the grammar of the language, which is taught using English terms.

While the program as outlined provides for differentiated outcomes for each year level, the actual teaching and learning strategies, especially in the upper grades, need to be further developed in order to achieve the identified learning outcomes.

A–E grades are reported to parents each semester, but it is not clear what evidence is used to make a judgement. However, as a result of recent professional learning, the teacher has begun to develop simple assessment rubrics to guide assessment of the program.
**Staffing and resources**
The program is taught by a qualified and experienced language teacher with the support of an Assistant Teacher (AT).

There is a language room where two language workers produce resources. These resources consist of mainly paper resources: books, flashcards and worksheets. These workers have been supervised by the deputy principal, culture, another qualified Aboriginal teacher, who is a member of the school leadership team.

The curriculum coordinator responsible for the implementation of the school curriculum plan currently works with the teacher to provide some support to meet the school requirements for planning and assessment.

The program, including teachers and language workers, is funded from within the school budget.

**Professional learning**
The teacher has had access to a two-day workshop each year with teachers of Aboriginal languages from other schools in the sector and one visit a term from a curriculum consultant. These workshops and visits have included introduction to using the interactive whiteboard for teaching and strategies for assessment.

The teacher has previously enrolled in the Graduate Certificate in Teaching Aboriginal Languages run through Sydney University. Despite attending one workshop and receiving tutorial support, she did not complete the unit successfully but is keen to continue with post-graduate education.

Informal support is provided from a visiting linguist undertaking research in the community.

Attempts to deliver regular school-based sessions in language, including literacy, for younger ATs in the school were begun but could not be sustained.

**Strengths and opportunities**
Language has been taught and used as a medium of instruction in this school for more than 30 years. The current curriculum draws on curriculum work done in the 1990s by a cohort of qualified local teachers working with a group of Elders in collaboration with an international non-government organisation, a local language centre and a higher education institution.

**Weaknesses and threats**
Many of the qualified teachers involved in the development of the program have now retired, and while there is some interest from younger ATs in teaching language, there is no obvious professional and career development pathway to achieve this.

Teachers and ATs lament the decline in involvement of the old people in the program, reinforcing the importance of their involvement in leading and working in the program.
School 2 First language (L1) maintenance - culture only

The language
The language is used as the language of everyday communication in this community (pop: 1200). The children have typically learnt the language from their families as a first language and use it at home and at play. The students may have varying skills in other languages, including varieties of English, and are learning English at school.

The focus of this program is culture only.

Student participation and achievement

School enrolment: 299

Student achievement in ILC as reported to parents:

- finding out information about country, people and kinship and the natural environment through active listening, showing interest, asking questions and contributing ideas
- developing the full range of vocabulary, including classificatory and topic language
- learning ways to talk with others, including peers and Elders
- learning about the different languages and forms that might be spoken/used in their community.

A–E grades were recorded in SAIS, but it is not clear how the students were assessed or what criteria were used to allocate grades.

Staffing and resources
The program is organised to be delivered for one week a semester in class groups by Elders and with the assistance of the ATs. The co-principal of the school, a qualified and experienced local teacher, provides leadership for this program.

The program is funded from within the school budget.

Professional learning
ATs are enrolled in formal training through the Diploma of Education Support at Batchelor Institute of Indigenous Tertiary Education and undertake some units related to teaching language and literacy including a specific unit, Supporting the Teaching of Indigenous Languages and Cultures, within this program.

Strengths and opportunities
There is a history of language work and written materials from a past bilingual program. The current program has been running for about four years and is deemed by the school to be sustainable in terms of resources.

Weaknesses and threats
None identified.
School 3 Language revival (LR) revitalisation

The language
The language taught is the language of the country on which the community has been developed (pop: approx. 1200) and is the heritage language of the majority of the students. The language is spoken by some of the adults but not all. Kriol is the language of general communication in the community and would be the first language of most of the students, who learn through the medium of English at school. Some children have some passive knowledge of the language, but few students come to school with even a limited capacity to speak the language.

Student participation and achievement

School enrolment: 164

Student achievement in ILC as reported to parents:

The program
Students from Pre-school to Year 9 have 90 minutes a week scheduled into the school timetable. Currently, students go to the language room, where they are taught by a teaching team of a non-Aboriginal teacher-linguist and the language teacher, who is an experienced AT with two years of formal teacher training. A culture week for students to go On Country with Elders is scheduled each semester.

A thematic program is developed between the teacher-linguist and the language teacher with a focus on listening and speaking, cultural knowledge and learning about the language. Learning outcomes are identified from the NTCF ILC and language-specific linguistic work provided by a visiting linguist from the department.

A teaching model for each lesson is used that is based around the ‘Do-Talk-Record’ model and includes:

- songs
- introduction of new topic/language
- an activity reinforcing new language/topic
- recording learning through drawing, group murals and writing.

Students in the older years are encouraged to read stories in language, to write words and sentences and to label drawings, pictures, charts, diagrams and short texts.

There is no clear set of assessment tasks to establish baseline data for measurement of learning and achievement. The teacher-linguist feels that this is necessary to ensure differentiated delivery and valid assessment of progress and achievement, as students come with varying levels of language proficiency.
Staffing and resources
The school is designated as a bilingual school and receives additional funding for the delivery of the program.

The program is staffed by a teacher-linguist, a qualified non-Aboriginal teacher with significant experience in language teaching and working in remote NT contexts, an AT who is a language speaker with two years of teacher training and many years of experience in the classroom, and two Elders who share a literacy worker position. Further support has been provided by visiting linguists and consultants from the department.

A significant number of resources that have been developed over a long period of time are available for use. These resources include sample programs, handbooks to support delivery, and a range of visual and print resources.

There are currently a number of younger people employed through a Parent and Community Engagement (PACE)/Indigenous development grant to write and record songs in the language working in the language centre. These young people are available to work with the students in small groups under the direction of the teacher-linguist and the AT.

Professional learning
Teachers and ATs participate in regional moderation workshops with other schools in the region.

One of the ATs indicated that she had participated in a short training program from the Resource Network for Linguistic Diversity (RNLD) program run by visiting linguists but could not provide details. The AT also indicated that she would like to learn more about the language, about linguistics and reading and writing.

Strengths and opportunities
There are a range of quality curriculum resources, including model programs and activities to support the teaching of listening and speaking.

A PACE/Indigenous employment program being run within the community provides opportunities for young adults to continue to learn the language and to work with children in an on-the-job apprenticeship-type model.

Weaknesses and threats
The program is vulnerable to staffing changes. It is currently taught by a teaching team of a non-Aboriginal teacher and a local AT, who is a speaker of the language. It is not clear whether there are other speakers with similar experience and teacher training who would easily be able to replace the current language teacher.

While there are a lot of resources, there needs to be documentation of the program and resources in a way that is accessible for handover to new staff.

The AT is clear that this program cannot be responsible for making the language the main language of communication in the community again. She speaks the language to her own children and grandchildren and teaches the language in school, but she cannot change what language people in the community choose to use for the full range of functions.
School 4 Second language (L2)

The language
The learners are typically English language speakers learning the language. The language taught is not the language of the country where the school is located as this is no longer used and spoken with a full linguistic code. The language taught belongs to another area in the NT where it is still spoken right through and used as the main language of communication. There are speakers living locally who can act as part-time teachers. The school has written permission to teach the language from the owners of the language being taught and the local language group.

Student participation and achievement

School enrolment: 367

Student achievement in ILC as reported to parents:

The program
The program was introduced as a way of increasing the number of Aboriginal students who achieve in the Languages learning area of the middle school curriculum and to provide a foundation for the study of Aboriginal languages in senior secondary school. It was intended to enhance the understanding of Aboriginal cultures and to develop empathy among non-Aboriginal students enrolled in the program.

Students have scheduled lessons of two hours a week. While none of the allocated teachers are speakers of the language, they have identified some local informants to provide language input. In Year 7, there is a general introduction to Aboriginal languages with a heavy emphasis on cultural content. Students can exit after one semester. In Years 8 and 9, students choose to study the language for the whole year and move onto language outcomes, including greetings, vocabulary and making sentences, and the study of some creation stories.

Staffing and resources
A teacher is allocated to coordinate and deliver the program, and a budget allocation from within the school budget is provided for resources and part-time instructors.

The language is taught by a teaching team, with a qualified teacher who is not a speaker of the language supported by part-time language speakers/teachers. It is difficult maintaining the regular input of the part-time language speakers/teachers as they sometimes return to their home community or have family and other responsibilities that take priority.

There is a range of visual, digital and print resources available for use. There is access to sites of the local cultural group, and students respond positively to excursions to collect bush tuckers.

Professional learning
The coordinating teacher has undertaken the Yolngu Studies course at Charles Darwin University but has identified the need for professional learning in language teaching strategies.

Strengths and opportunities
The program has been running for some years and is seen positively by school leadership as having reduced racism within the school. Having Aboriginal adults in the school as teachers has assisted in changing perceptions some non-Aboriginal students may have had about Aboriginal people.

There is some interest in using technology for speakers On Country to have more input into the program.

Weaknesses and threats
The main issue is maintaining the teaching team, with speakers who may come and go back to their home communities.
School 5 First language (L1) bilingual

The language
The language is used as the language of everyday communication in this community (pop. 2200). This is the language of the country on which the school has been built; however, there are families from seven different language groups who have moved to live in this settlement. All children are being raised to speak the language taught in the school as their first language for use at home and at play. They may have varying levels of competence in other languages that they identify with as their family or clan languages. They have little capacity in English before they come to school. The language is used as a medium of instruction for teaching literacy and other subjects of the curriculum.

Student participation and achievement

School enrolment: 760

Student achievement in ILC as reported to parents:

The program
The program was first established in 1974 and used the NT Government Step model. The first language was the medium of instruction for 90% of the time in Transition, with 10% of the time allocated to learning English with decreasing proportion to English until Year 3. At this time, the program was 50:50 language and English. In practice, the program at this school now operates as 50:50 language—English from Transition until Year 3 when English becomes the main language of instruction, but the language is maintained through a formal literacy program until Year 7.

There is a scope and sequence for the program developed from the NTCF ILC curriculum. The program uses a whole-language approach with a strong phonemic awareness/phonics program.

A–E grades are reported to parents based on classroom observations, some letter-sound recognition tests, reading running records and writing portfolios.

Pedagogies are mainly whole-class activities, with some small-group work involving worksheet activities under the supervision of an AT.

There is also a culture program in which Elders from all ceremonial groups come to school to teach stories and dancing one hour a week and support teachers and classes going on trips to country once or twice a term.
**Staffing and resources**

Resources for the program are allocated from within the school budget. There are eight qualified teachers on the staff who speak the language as a first language—six who do the language teaching and two who are engaged in coordination. There are also language-speaking ATs in each classroom.

An experienced teacher-linguist fluent in the language manages the literacy production centre (LPC). The LPC employs two local language workers to develop materials and a non-Aboriginal resource production officer.

There are a number of high-quality resources, including print materials, talking books with widgets and apps, visual posters, audio-visual materials depicting bush habitats, and workbooks that are produced and published on-site.

An Aboriginal leadership team within the school meets each week to advise the principal on the management of the school. They have undertaken the management of the ILC program and have recently identified its continuation into the secondary school as matter of priority within the school improvement plan.

**Professional learning**

Professional learning and development is a priority for the school, and a number of activities are available to staff.

Qualified teachers have been supported to:

- attend a two-day workshop each year with other teachers of ILC, focussing on pedagogy
- join a study tour of schools in Darwin identified as running successful literacy programs as a basis for discussing literacy pedagogy
- attend one hour a week with the teacher-linguist, working on their personal language skills, including reading and writing
- plan and prepare their lessons.

Assistant Teachers have been supported to:

- attend one hour a week with the teacher-linguist, working on their personal language skills, including reading and writing
- undertake in-service training in the Certificate in Education Support from Batchelor Institute of Indigenous Tertiary Education and the Bachelor of Education from Charles Darwin University
- undertake a study tour of Darwin schools to observe good literacy teaching pedagogy.

These activities are provided from within the school budget.

**Strengths and opportunities**

The program has been in place for more than 30 years and has community support.

The ongoing professional learning and support is producing a new generation of teachers able to continue the program.

**Weaknesses and threats**

The teacher-linguist is past retiring age but plays an important role in supporting the program through curriculum and resource development and professional learning. It is not clear whether any of the qualified language teachers would be able to take on this role.
The Desert Rose, the story of
Anmatyerr Language at Ti Tree, 2016

April Campbell

The desert rose has a strong slender stem. It has wide flat leaves that float around on the red earth. The stem and the leaves represent the Indigenous people and many different language groups.

The sunlight rises up in the morning, cold breath comes and blows the seeds across the desert.

The stems are reaching upward transplanting the new seeds, which means creating the stories and song lines across the desert. The rose petals fly in the air creating the special sites and relationships and connecting to the land.

Blooming colourful petals with strong knowledge, reaching out to our people, the desert rose gives us a life and direction to follow important laws.

Our people see a powerful metaphor that we have on our land. The spirits are invisible, people don’t see them. You can only hear their voices ‘calling and singing’ leading to a deeper understanding of our knowledges and different ways of thinking and doing.

One special site tells us, it is the meeting place of different language groups coming together to have ceremonies. The spirits always guide us throughout our Country. You’re never lost and you’re never, ever alone. The leaves reach far away to other boundaries and represent many voices that hold the petals together with important knowledge. As we move around the leaves, we find a flower that represents the storytelling through many different genres.
